

**REMARKS**

Amended claims 31-34 are shown beginning on page 2. The amendments are based on the structure of the claims as established by the Examiner's amendment mailed on November 8, 2007.

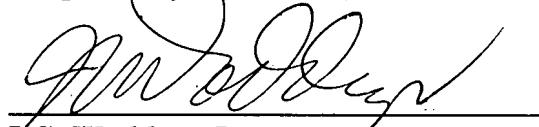

The suggested changes to the claims are not substantive, do not introduce any new matter, and do not require any further examination of the case. All of the changes are simply designed to make the claims read more smoothly. The structural elements of all the claims are still clearly within the amended claims, but the amended claims are more clearly understandable and therefore can be more easily interpreted by those reviewing the patent to determine the scope of protection set forth as awarded in this case.
